Technology Center 2600

Sir:

Responsive to the final office action mailed December 4, 2001 (hereafter the "Office Action"), please amend the above-identified application as follows:

IN THE CLAIMS

B1 Sub
C1

22. In a speech recognition system, a method of processing a voice command comprising:

identifying a voice command having a voice command component and a dictation component within a contiguous utterance, wherein said voice command component is specified by a command grammar and said dictation component is not specified by said command grammar; and

executing said identified voice command component using at least a part of said dictation component as an execution parameter of said voice command.
